Summary

Motivated and detail-oriented Web Developer fresher with a strong foundation in HTML, CSS, and JavaScript. Passionate about building responsive and user-friendly websites. Currently learning modern web technologies and continuously improving problem-solving skills. Seeking an opportunity to apply my knowledge, grow as a developer, and contribute to real-world projects.

z

Skills

Programming & Querying: HTML, CSS, JavaScript, Python
Frontend Development: Bootstrap, Tailwind CSS, Responsive Design
Development Tools: Git, GitHub, VS Code, Chrome DevTools
Other Skills: REST APIs, Debugging, Problem Solving

Experience

Web Development Project

November 2025 – April 2026

Personal Project (Remote)

Tools Used: Git, GitHub, VS Code

- **Hackathon Participant Project Developer** from multiple regions to support weekly analytics—enablMultiple National/College Hackathons — 2026 – Present
- Participated in 5+ hackathons, developing innovative web-based solutions in team environments, Built responsive projects using HTML, CSS, JavaScript, Python, and Firebase. Worked on rapid prototyping, debugging, testing, and final presentations under deadlines. Improved teamwork, problem-solving, and communication skills.
- **Technical Team Volunteer** —Nitra Technical Campus / College — 2026 – Present
- **Projects Developed** — **2026** — TruthWeave – Secure platform for storing and organizing sensitive information, developed during hackathon at **Thapar Institute of Engineering Technology**
- **Green Bharat Solution** – Sustainability-focused project developed during **Microsoft Office Noida Green Bharat Hackathon**.

Projects

1. TruthWeave – Secure Data Storage Platform | *JavaScript, Firebase*

March 2026 – April 2026

- Developed a secure web application to store and manage sensitive user data..
- Implemented user authentication and real-time database using Firebase.
- Designed responsive UI for seamless access across devices.
- Ensured data security and efficient organization for hackathon use-case.

2.Green Bharat Solution- Sustainability Web Platform | *CSS, JavaScript*

January 2026 – February 2026

- Built a responsive website to promote sustainability and eco-friendly practices.
- Designed interactive UI components to improve user engagement.
- Optimized layout for smooth navigation and fast loading performance.
- Ensured compatibility across different screen sizes and devices AND .

Awards & Certifications

- **Hackathon Certificate – Thapar Institute of Engineering Technology (2026):** Developed a web-based solution as part of a team during a 24-hour hackathon, focusing on problem-solving, UI design, and rapid development.
- **AI Tools ChatGPT Workshop – be10x (2026)-** Learned practical usage of AI tools and ChatGPT for productivity, content generation, and basic automation in development workflows.
- **Generative AI Certificate – GUVI (HCL) (2026) –** Gained foundational knowledge of Generative AI concepts and their application in building smart and interactive solutions..

Education

B.Tech Computer science Engineering

NITRA TECHNICAL CAMPUS, GHAZIABAD

Graduated: 2028

CGPA: 7.8 / 10
